

PERSONALISED HEALTHCARE SAVINGS SOLUTIONS

The **Agility** Healthcard is an innovative healthcare savings solution that offers individuals and employers a secure and flexible way to manage medical expenses. The Healthcard operates as a unique debit card exclusively dedicated to health-related expenses, providing accountholders the convenience of easy access to their healthcare funds while offering the control and freedom to tailor their savings according to their needs and budget.

KEY FEATURES

Tailormade Healthcare Savings

The **Agility** Healthcard functions similarly to a debit card, offering a convenient and hassle-free way to manage health-related expenses. Unlike traditional methods, this card is purpose-built exclusively for healthcare costs, ensuring that funds are allocated solely for medical needs such as doctor's visits, co-payments, pharmacy purchases, and more.

Flexibility in Funding

Members of the **Agility** Healthcard have the autonomy to decide how much they contribute to the card on a monthly basis. This flexibility makes it an ideal healthcare savings mechanism for individuals with diverse needs and budgets, ensuring accessibility to a wide range of individuals.

Year-End Fund Accessibility

The **Agility** Healthcard offers the option to withdraw any remaining funds at the end of the calendar year. Alternatively, members can choose to carry over their funds to the following year, providing an opportunity to accumulate savings for future medical expenses and establishing a long-term healthcare safety net.

Supplementary Healthcare Savings

Unlike being tied to a specific medical scheme, the **Agility** Healthcard operates independently, enabling individuals to supplement their existing healthcare savings and cater to unforeseen medical expenses. This flexibility is especially valuable for those without comprehensive medical cover or who wish to boost their healthcare savings.

Easy Funding Process

Funding the **Agility** Healthcard is designed to be effortless and efficient. Members can easily deposit funds into their account through methods like debit orders or electronic bank transfers, streamlining the contribution process and ensuring that the savings are secure for use at any healthcare provider.

Empowerment and Control

By functioning as a pre-funded savings mechanism, the **Agility** Healthcard empowers individuals to take full control of their healthcare financial planning. This control extends to both the amount saved and the choice of medical expenses covered, promoting a sense of ownership and responsibility for one's wellbeing.

Security

Underwritten by Standard Bank, the **Agility** Healthcard offers robust security measures, including PIN protection, to ensure that healthcare funds remain safeguarded against unauthorised access. This commitment to security enhances member confidence in utilising the Healthcard for their medical needs.

With its unique features, the **Agility** Healthcard has served as an essential tool in promoting financial wellness within the healthcare domain for almost two decades.

By providing a tailor-made, secure, and flexible solution for managing medical expenses, the Healthcard allows individuals and employers to take control of their healthcare finances, offering peace of mind and financial stability in the face of unexpected medical costs.
